

About Protegit

Protegit provides Strategic Project Management services and solutions to organisations in the commercial, defence and government sectors.

Protegit assists organisations drive strategy and business improvement through the application of common sense and best practice Project Management in the delivery of business projects.

Protegit Strategic Project Management provides a total project management service for its customers, that address the full life cycle of a project. We work with our clients to develop their strategy and requirements through to implementation.

Business Lines

Products and services are based around four distinct business lines:

- Professional Services
- Consulting services
- Systems Tools and Methodologies
- Project Office Support Services

People

Protegit people are like-minded, dynamic project management professionals with deep understanding of business processes. Our people are professionally trained, focused on excellence, and utilise the latest thinking in consultancy, project management and business improvement.

A core team of project management practitioners is supplemented by a network of professional staff and associates. Together, we ensure that the professional resources and services offered are appropriate to our clients specific circumstances and needs.

We strive to ensure our project managers have the right experience and are of the highest quality to ensure our clients requirements and expectations are not only met, but exceeded.

Protegit aims to retain, nurture, develop and grow our people over the long term, ensuring that they are available when you need them. And more importantly the valuable experience gained as a participant in the development of your company's project management capability and projects, is retained and built upon, to better meet your future needs.

Our approach and collective experience offers value for money and project confidence.

Areas of expertise

Protegit has significant experience in the optimisation and implementation of Project Management methodologies, across a diverse range of industries. We have personnel experienced in Project Management Office (PMO) establishment, the development and operation of IT applications and infrastructure, supply chain and logistics management and optimisation, business process mapping and improvement, and civil infrastructure masterplanning and design development.

We have significant experience in the operation of application and facilities hosting services, and ERP implementations and support (in particular SAP and Oracle).

Mission & Values

Customer satisfaction and success is the driving force behind our business.

We achieve our mission by subscribing to, and living, the following values:

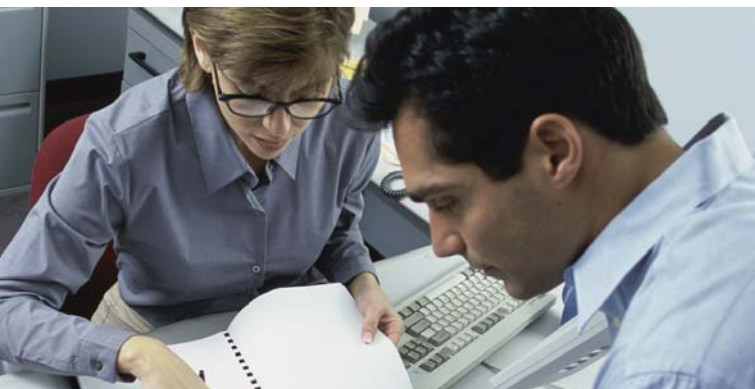

- A professional and open approach to each challenge
- Integrity in dealing with customers, staff and other stakeholders
- Teamwork, integration, and alignment with our customers
- Trust, truthfulness and sensitivity in all business interactions
- Continual theoretical and practical Improvement
- Individual and collective professional growth
- Creativity and innovation to achieve success
